External Funding Opportunities List

This list is intended to help you identify fellowships and grants that may fund your work.

To navigate, keep this document in print layout view, scroll to the table of contents, and click on the page number for any opportunity. This will take you to a brief description that includes a live link to the agency’s website. We update this document each summer. Deadlines may change and programs be eliminated or added at any time, so visit the agency’s website.

This list is not exhaustive. If you find nothing of interest, we recommend that you search the Pivot database. It is the most comprehensive online database of funding sources available and access is free with your KU log-in.

**EFFECTIVE TIME MANAGEMENT** is the best strategy for a successful application. The earlier you start, the better your chances!

You can copy and paste from this list to develop your own personal deadline-sorted list, add anything you may find in a Pivot search, and email us at the Research & Grant Development Office (RGDO) to schedule an appointment. One of us will be glad to meet with you about your funding needs, sources of funding, and resources available to help you win awards. We prioritize on a first come-first served basis and can offer our full services to applicants who start working with us well before application deadlines.

*Note:* Most of the opportunities listed here are for individual awards for which applications can be submitted directly RGDO or on your own. If an agency states that individual applications are not accepted or only non-profit organization may apply, that means the University of Kansas Center for Research (KUCR) or KU Endowment Association (KUEA) must submit your application on your behalf. Applications to federal agencies and those involving human studies research must be submitted through KUCR. Since we work with both KUCR and KU Endowment regularly, it may be helpful to have us serve as your interface, which we’ll be happy to do if you give us enough lead time.

In addition to the regular ACLS Fellowship, named fellowships include the following:

- ACLS Centennial Fellowships in the Dynamics of Place
- ACLS Donald J. Munro Centennial Fellowships in Chinese Arts and Letters

Most ACLS Fellowships are tenable at the fellow’s home institution, abroad, or at another appropriate site for research, although the International and New York Public Library Fellowships require residency.

**ACLS Frederick Burkhardt Residential Fellowships for Recently Tenured Scholars (individual)**

Burkhardt Fellowships are open to scholars who will have begun their first tenured contracts by the application deadline but began their first tenured contracts no earlier than the fall 2015 semester or quarter. An applicant must be employed in a tenured position at a degree-granting academic institution in the United States, remaining so for the duration of the fellowship. US citizenship or permanent residency is not required, and previous supported research leaves do not affect eligibility for the Burkhardt Fellowship. This is a residential fellowship; scholars who are unable to commit to a nine-month residence at one of the 13 participating centers should not apply. These fellowships support long-term, unusually ambitious projects in the humanities and related social sciences. The ultimate goal of the project should be a major piece of scholarly work by the applicant. Amount: $95,000 plus funds for research costs and related scholarly activities up to $7,500 and relocation costs up to $3,000.

**Deadline:** October 23

**Mellon/ACLS Scholar and Society Fellowships (individual)**

This program offers up to 12 tenured humanities faculty in PhD-granting programs in the US the opportunity to engage significant societal questions in their research, serve as ambassadors for
humanities scholarship beyond the academy, and deepen their support for doctoral curricular innovation on their campuses. The goal of the fellowship year should be to conduct a major research project in the humanities or humanistic social sciences that treats a significant issue or grand challenge in society—such as democratic governance; technological change; racism and inequality; climate change; economic exclusion; or migration and immigration, to name a few possibilities. Fellows also are required to participate in two workshops over the course of the fellowship year—the first, in the fall, is designed to help fellows refine their projects and build connections with scholars and institutions engaged in public scholarship and innovation in doctoral education; the second, in the spring, will offer a chance for fellows to reflect on their experiences and plan programming for the year following the fellowship. While projects should be informed by present-day issues in the public sphere, they need not be contemporary in focus. Includes $75,000 stipend plus up to $6,000 for research and related expenses.

**ACLS Comparative Perspectives on Chinese Culture and Society (institutional)**

These grants for collaborative work in China studies fund projects in the humanities and relate social sciences that adopt an explicitly cross-cultural or comparative perspective. The aim is to promote interchange among scholars who may not otherwise have the opportunity to work together. Proposals for activities from one institution or that fall within an institution's normal range of colloquia, symposia, or seminar series and regularly scheduled meetings, conventions or parts thereof will not be supported. Proposals are expected to be empirically grounded, theoretically informed, and methodologically explicit. Proposals must also include at least one scholar from Taiwan as a participant. The program supports collaborative work of three types, Planning meetings (up to $6,000), workshops ($10,000 to $15,000) and conferences (up to $25,000). Check the website for category details. Events must be held between June 2020 and December 2021

Mellon/ACLS Public Fellows Competition for Recent Scholars (individual)
This program will place up to 21 recent PhDs from the humanities and humanistic social sciences in two-year term staff positions at partnering organizations in government and the nonprofit sector. ACLS seeks applications from recent PhDs who aspire to careers in administration, management, and public service by choice rather than circumstance. Competitive applicants will be able to demonstrate sincere interest in the field of work of their selected fellowship and will have a record of success in both academic and extra-academic endeavors. Fellows will participate in the substantive work of these organizations and receive professional mentoring. Fellows receive a stipend of $68,000 per year and have access to individual health insurance, a relocation allowance, and up to $3,000 to be used toward professional development activities over the course of the fellowship term. The aim of this program is to expand the role of doctoral education in the United States by demonstrating that the capacities developed in the advanced study of the humanities have wide application, both within and beyond the academy. The Mellon/ACLS Public Fellows program allows PhDs to gain career-building experience in fields such as public policy, development, conservation, arts and culture, and media.

**National Endowment for the Humanities (NEH)**

The NEH provides both fellowships to support individual scholars' research and institutional grants that must be submitted through KUCR. Fellowships cover from six to twelve months at a stipend of $5,000 per month, up to $60,000 for a twelve-month period. Scholars compete in junior and senior divisions. The award period must be full-time and continuous and major activities unrelated to the research may not be undertaken during the fellowship period. Although they must be submitted via grants.gov, NEH Fellowships are awarded to individuals, not to institutions. They do not require cost sharing and do not include indirect costs. NEH's institutional grants must be submitted through KUCR and take time to prepare even when the maximum amount available is small. Starting early is a necessity in order to be competitive. Individual fellowships are listed first below, followed by institutional grants.

Such scholarship might present a narrative history, tell the stories of important individuals, analyze significant texts, provide a synthesis of ideas, revive interest in a neglected subject, or examine the latest thinking on a topic. Books supported by this program must be grounded in humanities research and scholarship. They must address significant humanities themes likely to be of broad interest and must be written in an accessible style. Making use of primary and/or secondary sources, they should open up important and appealing subjects for wider audiences.
